***"All programs, except for Pharmacy Technician, Phlebotomy and Clinical Medical Assisting can be completed through live online portals where students can watch previously recorded lectures at their leisure. This allows a student to start classes when they want and still have the same educational experience as those attending class since they are still working with the same instructor. It is a matter of when and where they are watching the lecture."***

## Certified Clinical Medical Assistant with CCMA Certification

Medical Assistants are responsible for a variety of medical office tasks from administrative to technical and scientific duties and must have quality human relations skills. Some of the job duties include cleaning and dressing wounds, taking blood samples, administering medications, taking vitals, preparing a patient for EKGs, obtaining a patient's history, and assisting physicians during examinations.

Our program provides virtual reality style classroom work as well as traditional style teaching for a blended learning experience. Practicals are performed during the program to ensure that the student has proper techniques and will be ready to pass the National Certification. Upon completion of the program, you will sit for your CCMA (Clinical Certified Medical Assistant) national certification exams through NHA. Tuition includes national certification, 6 practice exams, online study guide materials, books, resume assistance, and all other associated fees. Externships may be available in your area.
